Object : Recommendation letter for Mr. Paul QUIQUE

To whom it may concern,

As an Associate Professor in the Department of Physical Sciences at the University of Versailles/Saint-Quentin-en-Yvelines (UVSQ) and a researcher at the Versailles Systems Engineering Laboratory (LISV), I had the opportunity to work with Mr. Paul QUIQUE during an internship he completed at LISV, focusing on the development of a graphical interface for a numerical optimization tool developed in the laboratory.

During this internship, Mr. QUIQUE had to familiarize himself with scientific fields that were new to him, namely robotics and numerical simulation tools for material deformation.

Throughout my interactions with Mr. QUIQUE, I observed his numerous academic and personal qualities. He stood out for his diligence and commitment, which reflect his strong determination to succeed in his studies. His work on this project was characterized by a rigorous approach and remarkable initiative, enabling him to tackle challenges with autonomy and efficiency.

In summary, I strongly recommend Mr. Paul QUIQUE and am confident that he will be a valuable asset to your company. I remain at your disposal for any further information.

Vincent Chalvet
Associate Professor UVSQ
